PROFILE

I am interested in the evolving technologies for **renewable energy** and new **sustainability** practices.

Aside from my university education, I've self-studied tools like **JavaScript, PHP,** and **Unity**, and gained experience in computer **hardware** and **troubleshooting** with MS Office, Windows, Linux, and macOS.

Through working in this field, I have developed a **technical understanding** and **logical** mindset that help me find solutions to complex problems.
I enjoy working as **part of a group** and also participate in multiple sport teams in my free time.
